

“Our project has definitely evolved and is still in the process of evolving. For the past two years, we brought our Mobile Innovation Center to all our elementary schools, some community events, and to a few school events. Through those two years, the MIC was a catalyst for STEM growth in our district. Our superintendent loved what we were doing on the MIC but we wanted to expand the impact. Last year, we passed a bond issue that allowed us to put an Innovation Room into each of our 19 elementary schools. Now, teachers have access to many of the same tools we were using on the MIC any time they want.” Bob Deneau, Rockwood SD
